

I have heard about early intervention. Most children got better at talking with their body language and words after they got early intervention.*

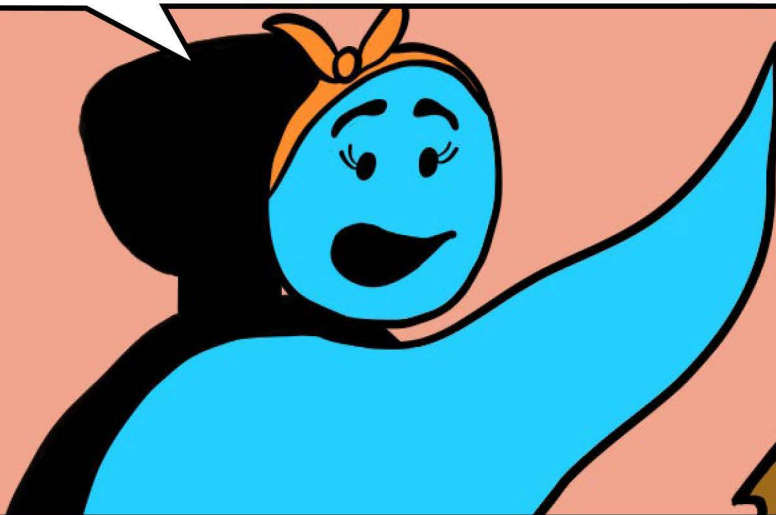

7 in 10 Virginians

*in 2020

Yes. In 2020, Covid-19 made people stay away from each other. Children were sad and couldn't connect with others. Early intervention still helped kids get better at showing their feelings.** Maybe they can help your son smile.

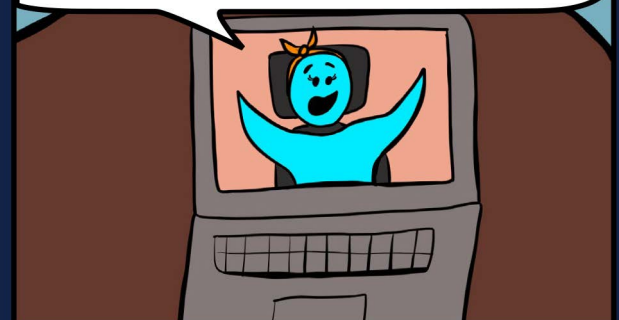

** in 2020

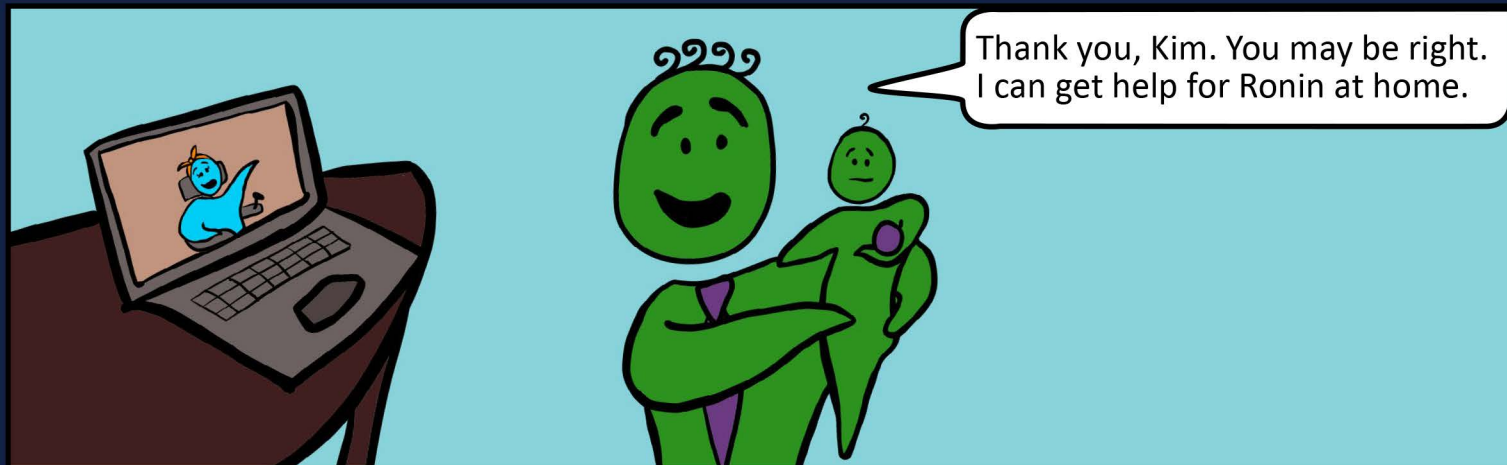

Early intervention sounds great for other kids. My son does not need help though.

I am a good parent. There is nothing wrong with him.

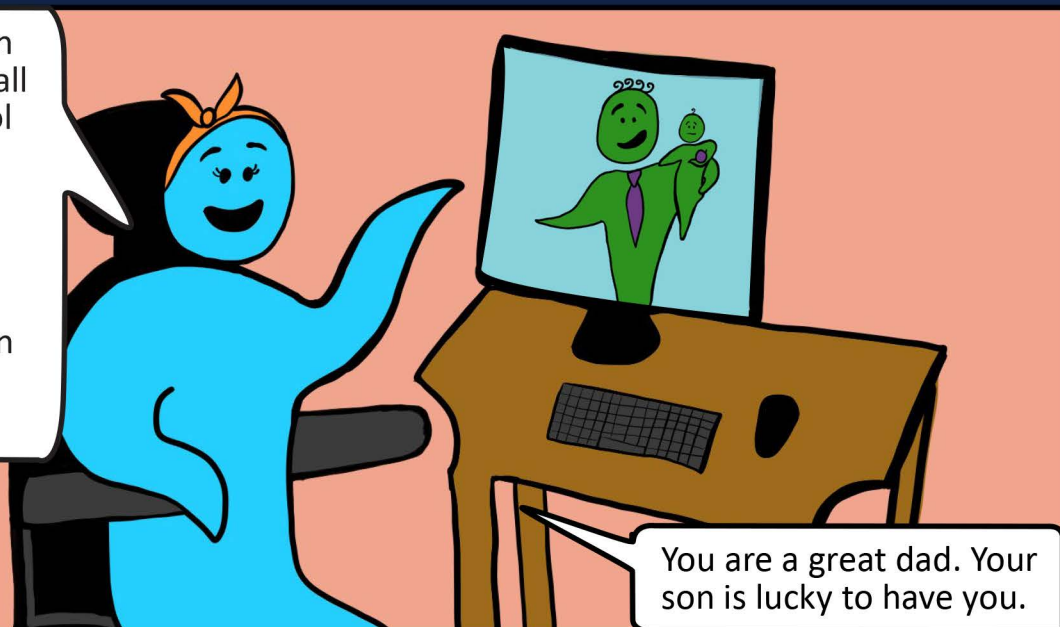

Early intervention does not mean you are a bad parent. It does not mean there is something wrong with your son. Early intervention helps kids be the best they can be.

They can help him transition into preschool too. Almost all kids switched into preschool quickly.***

Talk to your doctor about the milestones checklist. Your doctor can help with a referral to early intervention if your son needs it. Early intervention is free.
